<p>A new detergent compsn. for dry cleaning contains one or a mixt. of sulphotricarballylic ester salts of formulae (I) and (II)</p> <div style="display: flex; justify-content: space-around; align-items: center;"> <div style="text-align: center;"> $\begin{array}{c} \text{CH}_2\text{COOR}_1 \\ \\ \text{XO}_3\text{S}-\text{C}-\text{COOR}_2 \\ \\ \text{CH}_2\text{COOR}_2 \end{array} \quad (\text{I})$ </div> <div style="text-align: center;"> $\begin{array}{c} \text{XO}_3\text{S}-\text{CHCOOR}_1 \\ \\ \text{CHCOOR}_2 \\ \\ \text{CH}_2\text{COOR}_3 \end{array} \quad (\text{II})$ </div> </div> <p>R_1, R_2 and $R_3 = 1-20\text{C}$ opt. branched alkyl or alkenyl, or one of H, alkali metals, alkaline earth metals and org. amines (at least two of them are the alkyl or alkenyl gps.); and $X =$ alkali metal alkali earth metal, or org amine.</p>	<p>USE/ADVANTAGE The compsn. has good phase stability and a good water-solubilising ability (a hydrated ability). It thus readily forms a uniform pretreating liq with any commercial petroleum solvent.</p> <p>EXAMPLE (I) and (II) include the sodium salts of tri-2-ethyl butyl sulphotricarballylate, trihexyl sulphotricarballylate and tri-2-ethyl hexyl sulphotricarballylate, and the potassium salts of trioctyl sulphotricarballylate, trioctyl sulphotricarballylate, and tributyl sulphotricarballylate.
